IMPORTANT SAFEGUARDS

When using an electrical appliance, basic safety precautions should always be adhered to, including the following:

1. **Read all instructions.**
2. To protect against risk of electric shock, do not put motor base in water or other liquid.
3. Close supervision is necessary when any appliance is used by or near children.
4. **Always unplug unit from outlet when not in use, before putting on or taking off parts, before cleaning, and before removing food from bowl. To unplug, grasp plug and pull from electrical outlet. Never pull cord.**
5. Avoid contact with moving parts.
6. Do not operate any appliance with a damaged cord or plug after the appliance malfunctions, or if appliance has been dropped or damaged in any manner. Return the appliance to the nearest authorized Customer Service (see Warranty for details) for examination, repair, and electrical or mechanical adjustment.

7. The use of attachments not recommended or sold by Cuisinart may cause fire, electric shock or injury.
8. Do not let cord hang over edge of table or counter, or touch hot surfaces.
9. Do not use outdoors.
10. Keep hands and utensils away from moving blade while processing, to prevent the risk of severe injury to persons or damage to the chopper/grinder. A scraper may be used, but must only be used when the chopper/grinder is not running.

12. To reduce the risk of injury, never place cutting blade on base without first putting work bowl properly in place.
13. Be certain cover is securely locked in place before operating appliance. Do not attempt to remove cover until blade has stopped rotating.
14. Do not attempt to defeat the cover interlock mechanism, as serious injury may result.
15. Before using, check work bowl for presence of foreign objects.

TIPS FOR PROCESSING FOOD

Preparing the Food

Size

Always cut large pieces of food into smaller pieces of even size – about ½ inch (12mm) to a side or as specified under Operation/Technique on pages 6 and 7. If you don't start with pieces that are small and uniform, you will not get an even chop.

Quantity

Do not overload the work bowl. Overloading causes inconsistent results and it strains the motor. As a rule of thumb, remember most foods should not reach more than ¾ of the way up the workbowl. Use the quantities given in the charts and recipe section as a guide.

Note: Due to the powerful motor provided with this unit, it is recommended to use one hand to support the Cuisinart Elite Collection® Chopper/Grinder during operation.

Selecting the Right Operating Control

Use the **Chop** function for chopping, puréeing and mixing. It is the right choice, for example, for chopping soft, fragile food such as herbs, celery, onions, garlic and most cheeses. It is also the right choice for puréeing cooked vegetables, making mayonnaise, and mixing salad dressing.

Pulse action is best when you are using the Chop function. Two or three pulses are often enough. Be sure to check the food frequently to prevent overprocessing. If you overprocess, you are likely to get a watery paste instead of a fine chop.

Use the **Grind** function for grinding spices, and for chopping hard food such as peppercorns, seeds, chocolate and nuts.

Continuous-hold action is best when you are using the Grind function. You may have to operate the Cuisinart Elite Collection® Chopper/Grinder for several seconds with some food to achieve the desired results – or as long as 20 seconds for some seeds.

When you operate the unit for more than 10 seconds, use a pulse action every 10 seconds or so to allow food to drop to the bottom of the work bowl. This provides more consistent results.

Never operate the Cuisinart Elite Collection® Chopper/Grinder continuously for longer than 1 minute at a time.

Note: The work bowl and cover may become scratched when you use them for grinding grain and spices. This does not affect the performance of the Cuisinart Elite Collection® Chopper/Grinder. However, you may want to reserve the original bowl for grinding, and purchase an additional bowl and cover set for other uses. These are available from the Cuisinart Customer Service Department, which you can reach by dialing our toll-free number: 800-726-0190.

Adding Liquid

You can add liquids such as water, oil or flavoring while the machine is running. For example, you might want to add oil when making mayonnaise or salad dressing, or you could add vanilla or alcohol when making frozen yogurt. Pour the liquid through one of the two openings in the cover.

IMPORTANT: Add liquid through only one opening at a time. The other opening must be left free to allow air to escape. If both openings are blocked, liquid cannot flow smoothly into the bowl.

Removing Food from the Sides of the Bowl
Occasionally food will stick to the sides of the bowl as you process. Stop the machine to clear food away. **AFTER THE BLADE HAS STOPPED MOVING**, remove the cover, and use the spatula

to scrape the food from the sides of the bowl back into the center. Do not put hands into bowl unless unit is unplugged.

Note: Handle with care – the blade is not permanent.

PROCESSING FOOD

1. **Place the work bowl firmly on the motor base.** Opening at back of bowl must face column at back of the Cuisinart Elite Collection® Chopper/Grinder. Turn bowl counterclockwise to lock in place.
 2. **Insert the blade assembly.** Carefully pick up the blade by its hub and place on the center stem until it drops to the bottom of the stem. Firmly push to lock the blade into position. **NEVER TOUCH THE BLADE ITSELF AND NOTE THE BLADE IS NOT PERMANENTLY LOCKED.**
 3. **Place food in the work bowl.** Be sure the food is cut into small pieces, and the bowl is not overloaded.
 4. **Lock the cover into position.**
 5. **Press the appropriate Chop or Grind control,** depending on the food you are processing.
 6. When you have finished processing the food, **stop the machine by releasing the control button.**
 7. **WHEN THE BLADE STOPS MOVING, unplug the unit.**
 8. **Remove cover and work bowl**
 - a. Turn work bowl cover clockwise to remove.
 - b. Turn work bowl clockwise to unlock it and lift it off base.
- NOTE:** Thicker ingredients can be removed while work bowl is still on base.

9. **To remove liquids and sauces from bowl:**

Simply pour ingredients out of work bowl. Our convenient BladeLock System keeps blade safely in place.

10. **To remove thicker ingredients from bowl:**

Carefully remove the blade assembly by holding the handle on the top of the sheath and gently pulling up to disengage blade lock. Remove food with spatula.

NOTE: HANDLE WITH CARE – THE BLADE IS NOT PERMANENT.

Tips: Always process foods in order, from dry to wet, to avoid having to clean bowl and blade between each task.

Never operate the Cuisinart Elite Collection® Chopper/Grinder without ingredients in the work bowl.

CLEANING AND STORAGE

To simplify cleaning, rinse the work bowl, cover, and blade immediately after each use, so that food won't dry on them. Wash blade assembly, work bowl, cover, and spatula in warm soapy water. Rinse and dry. Wash the blade carefully.

Avoid leaving blade in soapy water where it may disappear from sight. The work bowl, cover, blade assembly, and spatula can be washed on the top rack of a dishwasher. Insert the work bowl upside down and the cover right side up. Put the blade and spatula in the cutlery basket. Unload the dishwasher carefully to avoid contact with the sharp blade. Wipe the motor base clean with a damp sponge or cloth. Dry it immediately. Never submerge the motor base or the plug in water or other liquid.

The Cuisinart Elite Collection® Chopper/Grinder stores neatly on the countertop in a minimum of space. When it is not in use, be sure to leave it unplugged. The hidden cord storage underneath the motor base will help to keep excess cord off the countertop. Store the unit assembled to pre-

vent loss of parts. Store the blades as you would sharp knives – out of the reach of children.

The Cuisinart Elite Collection® Chopper/Grinder is intended for HOUSEHOLD USE ONLY.

MAINTENANCE: Any service other than cleaning and normal user maintenance should be performed by an authorized Cuisinart® Service Representative.

TROUBLESHOOTING

Motor doesn't start or blade doesn't rotate.

- Check that plug is securely inserted into outlet.
- Check that work bowl and cover are securely locked into place.
- Be sure to press only one operation control button at a time.

Food is unevenly chopped.

- Try cutting food into smaller, even-sized pieces.
- Try processing smaller amounts of food per batch.

Food is chopped too fine or is watery.

- The food has been overprocessed. Use brief pulses, or process for a shorter time. Let blade stop completely between pulses.

Food collects on work bowl cover or sides of prep bowl.

- This is normal; turn machine off. When blade stops rotating, remove cover and clean bowl and cover with spatula.

Food catches on blade.

- You may be processing too much food. Carefully remove blade. Remove food from blade with spatula and start over again.

To facilitate the speed and accuracy of your return, please enclose \$10.00 for shipping and handling of the product.

Please pay by check or money order (California residents need only supply proof of purchase and should call 1-800-726-0190 for shipping instructions).

NOTE: For added protection and secure handling of any Cuisinart® product that is being returned, we recommend you use a traceable, insured delivery service. Cuisinart cannot be held responsible for in-transit damage or for packages that are not delivered to us. Lost and/or damaged products are not covered under warranty. Please be sure to include your return address, daytime phone number, description of the product defect, product model number (located on bottom of product), original date of purchase, and any other information pertinent to the product's return.

Your Cuisinart Elite Collection® Chopper/Grinder has been manufactured to the strictest specifications and has been designed for use with the authorized accessories and replacement parts.

This warranty expressly excludes any defects or damages caused by accessories, replacement parts, or repair service other than those that have been authorized by Cuisinart.

This warranty does not cover any damage caused by accident, misuse, shipment or other ordinary household use.

This warranty excludes all incidental or consequential damages. Some states do not allow the exclusion or limitation of these damages, so they may not apply to you.

CALIFORNIA RESIDENTS ONLY:

California law provides that for In-Warranty Service, California residents have the option of returning a nonconforming product (A) to the store where it was purchased or (B) to another retail store that sells Cuisinart® products of the same type.

The retail store shall then, at its discretion, either repair the product, refer the consumer to an

independent repair facility, replace the product, or refund the purchase price less the amount directly attributable to the consumer's prior usage of the product. If the above four options do not result in the appropriate relief to the consumer, the consumer may then take the product to an independent repair facility if service or repair can be economically accomplished. Cuisinart and not the consumer will be responsible for the reasonable cost of such service, repair, replacement, or refund for nonconforming products under warranty.

California residents may also, according to their preference, return nonconforming products directly to Cuisinart for repair, or if necessary, replacement, by calling our Consumer Service Center toll-free at 1-800-726-0190.

Cuisinart will be responsible for the cost of the repair, replacement, and shipping and handling for such products under warranty.

BEFORE RETURNING YOUR CUISINART® PRODUCT

If you are experiencing problems with your Cuisinart® product, we suggest that you call our Cuisinart® Service Center at 1-800-726-0190 before returning the product to be repaired. Important: If the nonconforming product is to be serviced by someone other than Cuisinart's Authorized Service Center, please remind the servicer to call our Consumer Service Center at 1-800-726-0190 to ensure that the problem is properly diagnosed, the product is serviced with the correct parts, and the product is still under warranty.
